

COUNTER PIRACY SOLUTIONS

FOR ALL TYPE OF VESSELS

The offered Secure-Marine (patent pending) Counter Piracy System is born out of a exclusive cooperation with "Ameron" Bondstrand GRE products Secure-Marine and the Wetering Rotterdam Design, Engineering and Installation Services.

Secure-Marine BV

ANTI PIRACY SYSTEM

THE SYSTEM IS MEANT TO PROTECT VESSELS AGAINST ARMED ROBBERIES AND PIRACY ATTACKS.

MAIN GOALS

- Stop any boarding attempts.
- Force pirates to give up and seek for easier targets.
- Gain time and alert for navy support.

OUTLINE SYSTEM DETAILS

The offered “hot” and “cold-water” systems are based on the same principle.

- Special corrosion resistant (composite) pipe systems with nozzles at calculated intervals.
- Applied seawater with sufficient pressure and volume to pressurize the system lines.
- Create a “hot-water” deterrent or high pressure “cold-water” deterrent to prevent the access to your vessel.
- Options to apply “Eye-Irritating Agents” and remote control & monitoring functions are foreseen.

ADVANTAGES

- Modular light weight corrosion resistant components
- Limited adhesive bonding on board (grip type couplings)
- Procedures for installation on board without “hot work”
- Prefabricated pipe spools
- Installation package incl. flanges, flex-hoses-supports & consumables
- Utilizing & implementation into existing ships seawater and Energy sources
- Worldwide Engineering, Survey, Accesment and Installation Service Network
- After sales services
